# QUALITY POLICY

Customer and other stakeholder satisfaction is a strategic objective of Vimi Fasteners S.p.A., which is committed to ensuring it through:

- Improving product quality by providing timely responses to Customer requirements and continuously enhancing the company's competitiveness.
- Improving the effectiveness and efficiency of value-chain processes, including suppliers, to ensure the achievement of quality, economic and growth objectives, both organically and through external growth, for an organization that strives for excellence.
- Continuously innovating production processes through the adoption of new technologies and the most advanced production management approaches.
- Promoting a Quality culture that puts people at the center and is based on engagement, competence development, workplace improvement, and respect for the environment and society, in line with the principles of the European Green Deal and the commitments reported in the Sustainability Report.
- The organization guarantees unrestricted access to Customers and authorities

In addition to the Group Quality Policy principles stated above, MF Inox adopts the following commitments for products and services intended for nuclear applications, in accordance with the requirements of ISO 19443 and its Nuclear Safety Culture objectives:

- promoting and maintaining a strong Nuclear Safety Culture throughout the organization and the supply chain, ensuring that personnel understand the importance of their activities and their potential impact on nuclear safety;
- ensuring that, for products and services intended for nuclear applications, nuclear safety, quality, reliability and regulatory compliance take precedence over cost, schedule, production targets or any other business consideration;
- adopting a rigorous and conservative approach in decision-making, encouraging personnel to identify, report and address potential quality and safety concerns without fear of reprisal;
- ensuring full product traceability and authenticity throughout the supply chain;
- developing, monitoring and qualifying suppliers involved in the delivery of products and services for nuclear applications, ensuring that they share and support MF Inox’s commitment to quality and nuclear safety;
- pursuing continuous improvement of the management system and organizational processes to enhance product reliability, operational excellence and contribution to nuclear safety.
